WHO WE ARE

We are an ISO 9001:2015, ISO 13485:2016 certified National Women's Enterprise Woman - Owned - Small- Business with a cGMP manufacturing facility in our headquarters in California, and with offices in North Carolina, Illinois, Florida, Texas and the Netherlands.

OUR CAPABILITIES

Andwin Scientific partners with many of the same trusted suppliers that most of you do, but what sets us apart is our ability to secure exclusive discounts, and pass those savings directly to you. With our expert team, Andwin Scientific can source a wide range of items—everything from everyday essentials like toothpicks to specialized equipment like incubators—that many companies may not have access to. Our vast network and industry relationships ensure that you get the best products at the best prices.

SPECIMEN COLLECTION KITS & BIOLOGICAL COLLECTION KITS

Andwin can tailor your packaging to safely accommodate all kitting components for shipping, as well as completely customize artwork to conform to your brand from box art, labeling, and all applicable inserts.

CLASS 7 CLEANROOM

ISO 14644-1:2015 Certified

Our state-of-the-art ISO 13485:2016, ISO 9001:2015, cGMP compliant cleanroom allows us to support specialized kitting projects that require a high level of sterility and prevents contaminants during manufacture. Our cleanroom includes key areas such as staging for garbing and a manufacturing area with HEPA filters for air cleanliness and microbial air quality control.

Our facility is Class 7 – 10,000 U.S. FS209E compliant, which supports our existing kit manufacturing process and additional services. This includes procurement, storage and distribution of laboratory and clinical trial supplies, injection molding, and manufacture of Andwin's patented medicinal dispensing devices, administrative and project management activities.

CUSTOM LABELING AND GRAPHIC SERVICES

Cost Savings is imperative in today's market. The Andwin Printing Service Department assists customers to reduce costs by eliminating the need for tooling, print plates, and minimum production runs for high quality labels. Our staff will help you make changes to forms, inserts, and artwork to generate a pristine product.

ON BAG PRINTING

Bagger Printer

Andwin Scientific designs and develops complicated specimen transport kits
