# SealSafe® Starter Kits

# SEALS SAFE®

Patented SealSafe® adapters allow oral syringes to draw the exact amount needed while reducing the risk of accidental overdose, spillage, evaporation, and contamination. They fit snugly into most bottles in their size range allowing original child-resistant (C/R) caps to fit over the closures. To use, simply insert the tip of an oral syringe into a SealSafe® adapter seal, draw a measured dosage and remove the tip. The SealSafe® adapter quickly recloses providing a safe and clean seal.

- Maximize medication dosing accuracy
- Prevent evaporation, spills & contamination
- Original child-resistant and standard caps fit over the adapters
- Easy-to-read syringe dose marks never enter the bottle
- Prevent waste by always getting the last drop of medication
- Limit accidental access even when C/R caps are removed

# SealSafe® Adapters

Our patented SealSafe® adapters can also be punched to satisfy your extraction and viscosity needs.

**DO-IT SAFE™**  
with SealSafe®

## Pierced - Low Viscosity

Surrounds the outside of a blunt drawing device forming a tight seal. Best used for thinner viscosity liquids.

## Slit - Mid Viscosity

Minor separation during insertion of a blunt drawing device. Allows airflow while blocking more viscous liquids.

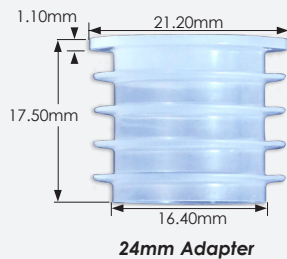

## Z-Cut - Thick Viscosity

Larger separation during insertion of blunt drawing device, further expanding airflow while blocking viscous liquids.

### Selecting an adapter size

SealSafe® adapters feature flexible sealing rings for compatibility with a range of bottle sizes. Catalog #760024 (24mm) fits snugly into most bottles with necks in it's I.D. (Inner Diameter) range of 15.5mm – 18.25mm.

Bottles should be selected for smooth inside necks sized within the stated inner diameter range. A smooth neck optimizes the ability of the closure to provide an effective seal.

# Safetex Pap Smear Kits, Cytology Kits and Accessories

## Andwin Pap Smear Kits. The Choice for Greater Reliability, Simplicity, and Economy.

Andwin's **No-Touch** and **Classic** Pap Smear Test Kits include all the components needed for specimen collection, smear preparation, fixation, and courier transport to the laboratory. Patented No-Touch kits provide excellent structural supports for the specimen slide and adhesive-free slide attachment allowing it to be easily removed from the folder by the lab technician. A large selection of kit components are offered in various combinations to meet your specific procedures. Custom kits are available upon request.

- Maximize slide specimen protection
- Wet slides are allowed to dry by the ventilated folds
- No tape or glue used to hold the slide to the folder
- Glue used to hold slides in place in Classic Kits
- Available with optional fixative spray bottle

### Andwin's Safetex No-Touch PAP Smear Kit

- Patented Slide I.D. viewing window.
- Patented adhesive-free No-Touch slide holder design.

### Andwin's Safetex Classic PAP Smear Kit

- Classic kits feature standard box-shaped transports and are the most economical choice.
- Standard glue slide holder attachment.

## Select preconfigured kits or design your own

Start with Andwin's **Safetex No-Touch Pap smear kit** or **Safetex Classic Pap Smear Kit** folder style and select the kit with the components you need. If the exact configuration you are looking for is not listed, we can produce it for you with a 25 kit minimum. Contact your Andwin representative at **(800) 497-3113**.

Fixative is provided in a quantity of 1 bottle per pack of 25 kits.

Our specimen collection containers are stackable, graduated, and include top and bottom knurls for ease of gripping with gloves.

### Sterile Collection Cups

Sterile containers come complete with white, blue or natural caps and optional tamper evident labels. Composed of sturdy 100% polypropylene material, the containers are 95kPa certified for air transport. Thinner sidewalls permit rapid temperature transfer for accurate temperature sensing of the specimen.

### Duo-Click

Duo-Click collection containers are ideal for maintaining the integrity of biological specimens during transport and storage. Duo-Click caps “click” twice when closed, indicating the container has been properly sealed and is resistant to leakage during transport.

- All Polypropylene containers are 95kPa tested
- Optional Duo-Click cap seal design
- Available with temperature indicator strips
- Select from 60mL, 90mL and 120mL sizes

# Rapid Drug Screen Cards

## The Fast, Easy and Economical Solution for On-Site Drug Screening

Andwin Drug Screen Cards perform lateral flow panel immunoassays for the qualitative detection of many common drugs of abuse. The low per-test cost, ease of use, and fast performance make this an ideal device for many drug screening applications.

### Rapid Results

Results may be read in as little as three minutes.

### Reliable Readings

Each unit features a built-in performance control. Tests are standardized to SAMHSA cut-off levels and are rated >99% accurate.

### Easy-to-Use

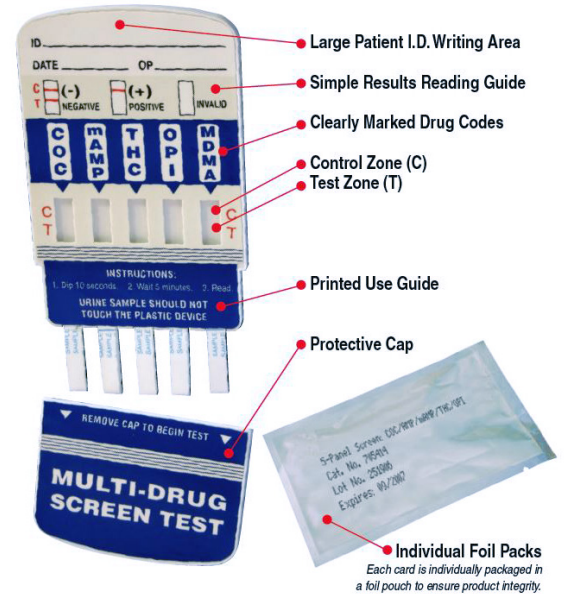

Follow the simple steps to administer each test.

### Convenient Storage

Cards may be stored up to 18-months at room temperature and are individually marked with an expiration date.

### Complete Selection

Single and multi-drug screen tests are available covering the most common drugs of abuse.

# Boritex<sup>®</sup> Urine Stabilization System

Boritex<sup>®</sup> tablets have a proprietary buffer component combined with boric acid that preserves urine specimens up to 72 hours in transport to hospitals and reference laboratories.

## Urinalysis Specimen Transport

Boritex<sup>®</sup> protects critical cells and casts by maintaining a controlled environment, which stabilizes the critical indicators and markers, used in dipstick testing.

## Pre-Culture Specimen Transport

Boritex<sup>®</sup> maintains the viability of potential bacterial pathogens found in the urinary tract system. Boritex<sup>®</sup> stabilizes the specimens up to 72 hours for delayed microbiological culture and analysis and prevents the over growth of incidental organisms.

- Urinalysis specimen transport
- Pre-culture specimen transport

# Disposable Gloves

Using the right pair of disposable exam gloves is essential for personal safety and that of others in work environments such as hospitals, labs, and schools. These gloves can increase comfort, boost work flow, improve production in the workplace, and offer performance, protection, and durability. Our selection of disposable exam gloves comes from trusted brands that provide high-quality safety standards required to prevent accidents in any work environment and protect what matters most at your facility.

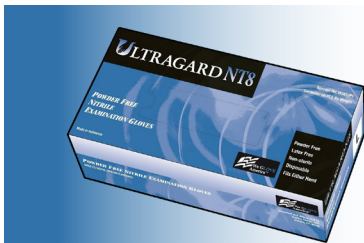

## Nitrile

Nitrile gloves are 100% latex free to eliminate potential allergic reactions to natural latex and provide superior puncture, tear, and chemical resistance with excellent tactile sensitivity and dexterity.

## Vinyl

Vinyl gloves are designed specifically for institutional and industrial use. They are great for applications that do not require a medical grade glove such as food prep, light-duty cleaning and general maintenance. These disposable vinyl gloves offer outstanding elasticity and tensile strength.

# Andwin Transfer Pipettes

## Transfer Pipettes

- Transparent, non-toxic & inert.
- Precise, uniform drop size.
- Shatter-proof & unbreakable.
- Can be used with LN<sub>2</sub> (-196°C).
- Heat sealable.

These unbreakable, one-piece pipettes are made of ultra-clear, low density polyethylene (LDPE) and are ideal for microbiology, blood banking, hematology, immunology, and urinalysis. Sterile pipettes are excellent for microbiology and tissue culture applications. Their low-affinity surface reduces sample, cell or protein loss.

# Andwin Blot Boxes

## Western Blot Boxes

- For whole blots, halves, strips, or minis.
- A perfect box for every blot.
- Reduce antibody usage.
- Hinged lid minimizes evaporation.

No matter what size your Western blot is, there's an MTC box that fits it perfectly. With boxes that are correctly matched to common blot sizes, you can fit more blots on shakers/rockers while keeping reagent and antibody usage to an absolute minimum. Additionally, all corners are formed at a 90° angle and the bottom surface is uniformly flat, further reducing consumption of costly reagents and antibodies.

# Andwin Film

## UHC Western Blotting Film

- Light Blue Base.
- Ideal for chemiluminescence.
- Suitable for <sup>14</sup>C, <sup>32</sup>P, <sup>33</sup>P, <sup>125</sup>I, <sup>35</sup>S.
- Ultra-High Contrast.
- Reduced Background.
- Publication Quality.

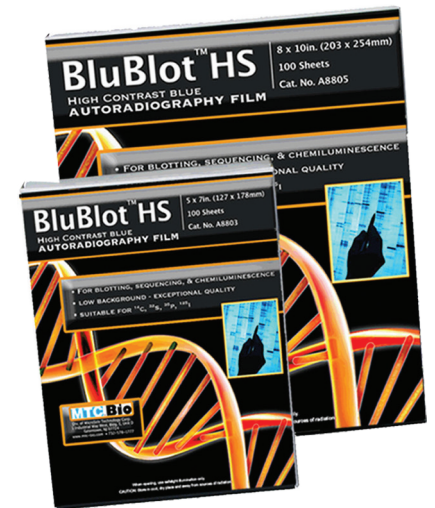

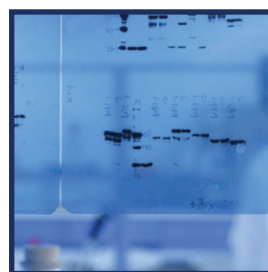

Specially formulated for an optimized balance of high contrast and minimal background. This low background, high contrast formula is produced on a lighter blue base, making it ideal for all autoradiographic and electrophoretic applications. In addition the UHC film is also coated on both sides (double emulsion) for improved consistency and overall performance. This new film reliably produces sharp images which allow for maximum DNA visualization with unsurpassed clarity.

Item No.	Description	Quantity
4692308	Blu-Lite Western Blotting Film, 5 x 7 in	100/CS
4692309	Blu-Lite Western Blotting Film, 8 x 10 in.	100/CS

## HS Western Blotting Film

- Medium/ deep blue base.
- Suitable for <sup>14</sup>C, <sup>32</sup>P, <sup>33</sup>P, <sup>125</sup>I, <sup>35</sup>S.
- Ideal for chemiluminescence.
- Publication quality.
- Double emulsion.
- High sensitivity.

High quality, highly sensitive film that is ideal for a wide range of electrophoretic and autoradiography applications. It can be used with calcium tungstate or blue-emitting rare-earth screens. It reliably produces sharp, bright images that are easily visualized and suitable for publication.

## Multi-Channel Pipette Racks

- Universal - Fits all popular pipettes.
- 5mm acrylic - 40% thicker.
- Non-skid rubber feet.
- Multi-channel "window" slots.

Our Pipette racks are unique in their ability to accommodate multi-channel pipettes without sacrificing any of the stability of a traditional acrylic rack. The patent pending "windows" allow the user to insert the multi-channel head longways through the rack, while keeping the body of the pipette stable by securing the pipette at two points; under the finger hook, and near the bottom of the handle.

Each rack is also outfitted with four non-skid rubber "feet" for extra stability. Our multi-channel pipette racks are guaranteed to be the sturdiest and most versatile pipette racks in your lab.

Window slots are the first of their kind, allowing the user to store single channel or multi-channel pipettes easily and conveniently.

## Variable Speed Mixer

- Metal housing with shock-absorbing feet.
- Can be used in cold room and incubators.
- Speed range of 600 to 3,200rpm.
- Cup head for a single tube; 3" platform for a beaker, flask, or multiple tubes.

Variable speeds of 600 to 3,200rpm for gentle shaking to rapid vortexing of samples, and can be operated by touch or in continuous mode. This mixer comes with a removable cup head for a single tube up to 40mm in diameter and 200mm in length, and a 3" platform for a beaker, a flask, or multiple tubes.

Item No.	Description	Quantity
SI-0236	Variable Speed Mixer	1/CS

## Microplate Incubator/Shaker

- Utilizes a warmed inner aluminum bed with air circulation to achieve outstanding temperature uniformity,  $\pm 0.4^{\circ}\text{C}$ .
- Inner chamber cover reduces risk of biohazard from the disbursement of aerosols and insulates the plates during incubation.
- Outer tinted Plexiglass cover further insulates and protects sensitive reagents from light.
- A circulating fan automatically switches on and off preventing condensation

Ideal for a variety of immunoassay and research applications. Accommodates two standard microplates or strip trays. Simple to operate; uses a microprocessor to independently set temperature, shaking speed and mixing duration. The mixer is quiet and rugged and can be programmed to run for a specified time or "pulsed" to stop after three seconds. Seven different speeds can be selected for gentle to vigorous mixing action.
